ABSTRACT

Data on fall 1980 enrollments in New Jersey colleges and universities are presented, along with comparisons between 1979 and 1980 fall enrollments and an analysis of enrollment trends over the past 10 years. Total fall 1980 headcount enrollment, both graduate and undergraduate, increased by 2.5 percent statewide over fall 1979. This growth indicates a continuation in the trend of slowly increasing enrollments over the past 10 years. While community colleges increased in enrollment by 6.6 percent, public four-year colleges declined by 0.3 percent, and enrollments at independent institutions increased by 2 percent over 1979 levels. The 1980 data show that differential growth rates between full-time and part-time students are continuing. Part-time students have grown as a proportion of total enrollments at both public four-year institutions and in the independent sector. The number of women attending college in New Jersey has grown steadily over the past decade. Data on full-time and part-time undergraduates are shown both for the United States as a whole and for New Jersey, and by sector for the 10-year period. Summary data are presented on undergraduate and graduate enrollments by sex, both full-time and part-time. The data for individual institutions and sector totals are also presented. (SW)

Summary

This data brief reports data on Fall 1980 enrollments in New Jersey colleges and universities, presents comparisons between 1979 and 1980 fall enrollments, and summarizes enrollment trends over the past ten years.

Total Fall 1980 headcount enrollment, both graduate and undergraduate, increased by 2.5% statewide over Fall 1979, from 311,653 last year to 319,322 this year. This growth indicates a continuation in the trend of slowly increasing enrollments over the past ten years. Compared with increases at the national level, the increase in opening fall 1980 enrollments in New Jersey, at 2.5%, was slightly lower than the national increase of 3.2% this year.

The growth in 1980 enrollments was not uniform across institutions or sectors. Community colleges grew by 6.6%, public four year colleges declined by 0.3%, and enrollments at independent institutions increased by 2% over 1979 levels.

The 1980 data show that differential growth rates between full-time and part-time students are continuing. Compared to 46% in 1971, part-time students made up 60% of total community college opening fall enrollment in 1980. Similarly, part-time students have grown as a proportion of total enrollments at both public four year institutions and in the independent sector, from 32% in 1971 to 42% in 1980 in the former and from 29% to 38% in the latter.

The number of women attending college in New Jersey has grown steadily over the past decade. The proportion of full-time undergraduates who are women has increased from 44% in 1971 to 51% in 1980; among part-time undergraduates women are now 60% of the total as compared with 44% in 1971. Among graduate students the proportion of women has increased from 21% to 36% for full-time students and from 39% to 52% of part-time students between 1971 and 1980.

The summary tables and graphs which follow display comparative enrollment data for Fall 1980 and Fall 1979 (Table 1) as well as the growth of enrollments over the ten year period 1971-1980 (Figure 1). The data on full-time and part-time undergraduates are shown for both the nation as a whole and New Jersey (Table 2) and by sector for the ten year period (Table 3, Figures 2 and 3). Summary data are presented on undergraduate and graduate enrollments by sex, both full-time (Tables 4 and 6) and part-time (Tables 5 and 7). Finally, the data for individual institutions and sector totals, upon which the summary tables and graphs are based, are presented in appendix Tables 9 through 20. These data are taken from NCES Form #2300-2.3 which collects undergraduate and graduate student enrollment data by sex and full-time/part-time status.

COLLEGE ENROLLMENT IN NEW JERSEY

In Fall 1980 the state's higher education system experienced an increase in every type of student population, both full-time and part-time undergraduates and graduates/professionals, for a total growth of 2.5% over 1979 levels. The current enrollment of 319,322 is an increase of almost 7,700 students from last year.

The largest increases occured in the community colleges, where full-time enrollment grew by 3.7 and part-time grew by 8.6%, for a total increase of 6.6% over 1979.

There was practically no change in state college enrollment (80,971 this year compared to 80,535 last year).

Rutgers University saw a 2% undergraduate decline and practically no change in graduate enrollment.

Independent college enrollment rose by almost 2%, attributed primarily to increases in their part-time student body (part-time undergraduates rose by nearly 2% and part-time graduate students rose by slightly over 4%).

ENROLLMENT GROWTH, 1971-1980

Total College enrollment in New Jersey has grown from 227,765 in 1971 to 319,322 in 1980, an increase of 40%.

Enrollment increases were relatively large during the early seventies, averaging 6% a year, and peaked in 1975. More recently, enrollments have continued to grow, but at a slower pace (an average of 2% a year between 1976 and 1980) than previously.

Full-time students continue to account for more than half of college enrollments, although the proportion of full-time students has been declining since 1971 when full-time students were 59% of total enrollments. Since then the full-time proportion has decreased steadily, such that in 1980 full-time students comprised approximately 53% of total enrollments. (Figure 1.)

1979-80 ENROLLMENT INCREASES, NEW JERSEY AND U.S.

This fall the National Center for Education Statistics (NCES) conducted a national sample enrollment survey of 999 colleges in order to project national 1980 enrollments. NCES projected a 3.2% increase over last year, which is slightly higher than the 2.5% increase seen in New Jersey.

Sources: N.J. statistics are derived from final data reported by the colleges on NCES HEGIS Form #2300-2.3 (Fall Enrollment & Compliance Report). U.S. statistics are based on a sample survey of 999 institutions, conducted by the National Center for Education Statistics.

* For the purpose of comparing NJ and US data in this table, the category "Universities" is comprised of Rutgers University (all campuses combined), even though the national classification considers only Rutgers, New Brunswick Campus, the "Public University".

The state increases in full-time and part-time enrollments differed from national trends. While full-time enrollment in New Jersey rose 1.3%, national projections indicated a 4.8% growth; and, part-time enrollment in the state rose 3.8%, far above the national figure of only 1.1%.

It is speculated that a weak job market is a major factor in contributing to increased full-time enrollments. Historically, economic down-turns have had a similar effect on higher education enrollments. The current economic condition has, therefore, partially off-set the decline in 18-year-olds, which was projected to result in college enrollment declines.

FULL-TIME UNDERGRADUATE ENROLLMENT

Full-time undergraduate enrollment rose 1% in the fall of 1980. The current figure of 154,749, compared to 153,270 in 1979, represents an increase of nearly 1,500 students. Consistent with recent trends, the increase is due to significant growth at the community colleges, which this year enrolled nearly 1,600 more full-time students than last year (Table 3). Over the ten year period, 1971-1980, total full-time undergraduate enrollments have increased by more than 25%.

1980	44,597	43,750	31,144	35,258	154,749

The Community Colleges' 10-year history shows an initial 5-year period of steady growth (by about 12,000 students) and an apparent leveling-off during the mid 1970's. Since 1978, however, enrollments have been on the upswing again, with an 8% increase in 1979 and a 4% increase for Fall 1980. The community college enrollment of 44,597 full-time undergraduates represents a 53% increase over full-time undergraduates enrollments in 1971.

At the State Colleges 1980 full-time enrollments increased by slightly over 200 students from the 1979 level (43,750 compared to 43,508). The 1980 enrollment represents an 11% decline from the peak year 1975. However, since 1971 full-time undergraduates have increased by over 30% at the state colleges.

In 1980 the Other Public 4-Year Colleges, which include Rutgers, NJIT, UMDNJ's School of Allied Health Professions, and Edison State College, experienced a very slight (0.2%) decline from the 1979 enrollment level. These institutions experienced steady growth between 1971 and 1978. In the past two years enrollment has stabilized

at somewhat more than 31,000 students. Overall, enrollment in these colleges as a group has increased 38% since 1971.

Full-time enrollments at the Independent Colleges increased by 200 students between 1979 and 1980. The 1980 figure, however, represents a slight upward shift in the ten year enrollment decline among independent institutions, although the number of full-time students has fallen by nearly 8% since 1971. Moreover, the independent institutions' share of total full-time enrollments has declined from 31% to 23% over the ten year period.

Figure 2 illustrates sector enrollment trends over the past ten years.

PART-TIME UNDERGRADUATE ENROLLMENT

Part-time undergraduate enrollment in New Jersey continues to rise; by 4% in 1980. Enrollments from 1971 to 1980 have increased from 67,000 to 116,000. The ten-year increase in students represents a growth of 73% (Table 4).

1979	61,246	23,804	13,992	12,836	111,878
1980	66,540	23,668	13,418	13,068	116,694

The Community Colleges continue to account for a growing proportion of the state's part-time students, from 37% in 1971 to 57% this year. Part-time enrollment in 1980 of 66,540 students compared to last year's figure is almost a 9% increase (about 5,300 students). Over the ten year period, the increase of over 41,000 students represents a growth of 164%.

In 1980 the State Colleges showed practically no change over the previous year (23,668 compared to 23,804). After a significant increase of 8.5% in 1978, the enrollment has been leveling off. The ten-year increase has been significant, however, growing by 35%.

The Other Public 4-Year Colleges, which consist of Rutgers, NJIT, CMDNJ's School of Allied Health Professions, and Edison State College, have been on a downward trend since 1978, declining by 2.5% last year and by 4.1% this year. The sharp decline in 1980 is due primarily to a 15% drop at Edison (from 4,268 students to 3,619). Rutgers declined slightly (0.4%), and NJIT saw a 5.6% growth in part-time undergraduate enrollments in 1980. However, for these colleges as a group,

part-time enrollments have grown by 45% since 1971.

Part-time enrollments at the Independent Colleges have been declining gradually for the past ten years, from a high of 15,300 in 1971 to slightly over 13,000 in 1980, a ten-year decline of 14.6%. In addition, the independent institutions' share of total part-time enrollments in the State has declined from 22.7% in 1971 to slightly over 11% in 1980.

Figure 3 illustrates sector enrollment trends over the past ten years.

UNDERGRADUATE ENROLLMENT BY SEX

Ten years ago, only 44% of New Jersey's undergraduates were women; today women account for 55%, more than half.

In the area of full-time undergraduates, the number of women has grown by 45%. In 1971 women comprised 44% of the state's full-time undergraduates, while by 1980 their share has increased to 51%. Their numbers have grown steadily at a much higher rate than the men. Even in 1976 when a state-wide enrollment decline occurred, the number of women enrolled did not drop. In 1980 the number of men enrolled was virtually unchanged compared to the previous year, while the number of women increased by 1,400.

The largest increases in the number of women students are at the part-time undergraduate level. In 1971 the proportion of women was 43% - in 1980 it had grown to 60%, such that there are now 70,000 part-time undergraduate women, 41,000 more than ten years ago. The male student population has grown by only 8,500. Throughout most of the ten-year period, it has been the dramatic increase in the number of women that explains the significant growth in undergraduate enrollment.

GRADUATE ENROLLMENT BY SEX

Women have also held their own in graduate/first-professional enrollments. The number of full-time women has more than doubled in ten years. While their proportion of the student body has increased steadily, women still account for only one-third of the state's full-time graduate students.
